Mayank Raj Gupta

Full-Stack Developer & AI Specialist | BCA Scholar @ Christ University, Bangalore

mayankraj.gupta@bcah.christuniversity.in | +91 9835139865 | Bangalore, India
Portfolio: mayankraj.me | GitHub: github.com/M20A03 | LinkedIn: linkedin.com/in/mayank-raj-gupta-159020396

PROFESSIONAL SUMMARY

BCA student at Christ University with hands-on experience building modern full-stack web applications and Computer Vision pipelines. Proficient in React, Next.js, TypeScript, Python (YOLO11, OpenCV), and Firebase, with solid foundations in Data Structures & Algorithms and UI/UX design. Creator of multiple deployed production web portals and active national hackathon participant. Seeking a Software Engineering / AI Internship to apply full-stack problem solving and deliver user-focused product impact.

EDUCATION

Bachelor of Computer Applications (BCA) Christ (Deemed to be University), Bangalore (2025 — 2029)	**3.33 / 4.0 CGPA** (2nd Semester) Coursework: DSA, OOP, DBMS, Web Architecture
Class XII (CBSE) — Senior Secondary Rajkamal Saraswati Vidya Mandir, Dhanbad, Jharkhand (2023)	**CBSE Senior Secondary**

TECHNICAL PROJECTS

Automated License Plate Recognition (ALPR) — YOLO11 & Computer Vision — GitHub: github.com/M20A03/License-Plate-Detection

Python, YOLO11, OpenCV, CRNN OCR, Streamlit

• Developed an end-to-end automated license plate detection system using YOLO11 for real-time vehicle plate localization.

• Implemented an OpenCV image preprocessing pipeline (grayscale, adaptive thresholding) and OCR for character recognition.

• Built and deployed an interactive Streamlit web dashboard capable of processing uploaded images and live video streams.

Wholesale & Retail E-Commerce Website (Roshan Enterprises) — Live Demo: https://e-commerce-roshan-enterprises-dhn.web.app/

React (Vite), Firebase Auth/Firestore, Context API, Lucide

• Engineered a production-ready commerce website supporting bulk wholesale ordering and retail consumer purchases.

• Built dynamic catalog filtering, interactive cart management, and seamless order history tracking.

• Enforced mobile-first responsive layouts, 16px iOS input zoom protection, and WCAG 2.1 AA accessibility checks.

DSA Search Algorithm Visualizer & Space Explorer — Live Demo: https://linear-and-binary-search.web.app/

JavaScript, HTML5, CSS3, AI Integration, WebAudio API

• Built 5+ step-by-step visual simulations for Linear and Binary search algorithms with dynamic visual pointer highlights.

• Integrated 'Star-Command AI', an intelligent conversational assistant to guide students through algorithm logic.

• Synthesized interactive audio frequencies for each comparison step to enhance educational comprehension.

MRG App: Next-Gen B2B2C Marketplace — Live Demo: https://mrg-idea.web.app/

React, Next.js, Node.js, Firebase Auth & Firestore

• Developing a marketplace platform connecting wholesalers, retailers, and customers with real-time inventory management.

• Designed a modern, responsive UI with glassmorphism aesthetics and performance-first component architecture.

TECHNICAL SKILLS

Programming Languages	Python (NumPy, Pandas), C, C++, JavaScript (ES6+), TypeScript, SQL
AI, ML & Vision	YOLO11, OpenCV, Computer Vision, CRNN OCR, AI Prompt Engineering, Streamlit
Frontend Frameworks	React 19, Next.js 15, Angular, Tailwind CSS, Framer Motion, HTML5, CSS3
Backend & Databases	Node.js, Express.js, Firebase (Auth & Firestore), Python Flask, MySQL
Developer Tools & Cloud	Git, GitHub, Vercel, VS Code, Figma, Vite, Linux/Bash, Postman

HACKATHONS & CERTIFICATIONS

• **InHack - Hackathon (Media Meet 2026)** — CHRIST University
• **YUGASTR IT FEST Hackathon (2026)** — Ramaiah College
• **AI Prompt Engineering Masterclass** — Microsoft & Reliance
• **CODEX'26 National AI Hackathon** — Don Bosco College
• **HACKNOVA Game Jam (2026)** — CHRIST University
• **C & HTML5 Certified** — Infosys Springboard
